

7M LIGHT MAST WITH 4X120W LED LIGHTS

A 7m mains-powered light mast for construction sites and events. A total of 6 light masts can be daisy-chained behind a single power supply. The light tower is silent and emission-free.

The light tower is equipped with a manual winch and a 359° rotating mast, making it easy to adjust the direction of the lights. Each light has its own on/off switch and can operate either manually or with a dusk sensor.

For easy transportation, the light mast features ergonomic retractable handles, forklift pockets, and a lifting eye. Four stabilizers ensure steady operation even in winds of up to 110 km/h. The tower has a system to prevent tipping over.

The tower's 5000K LED floodlights produce a total of 76,800 lm. The Proled Plus 19,200 lights used in the tower come with a 5-year warranty.

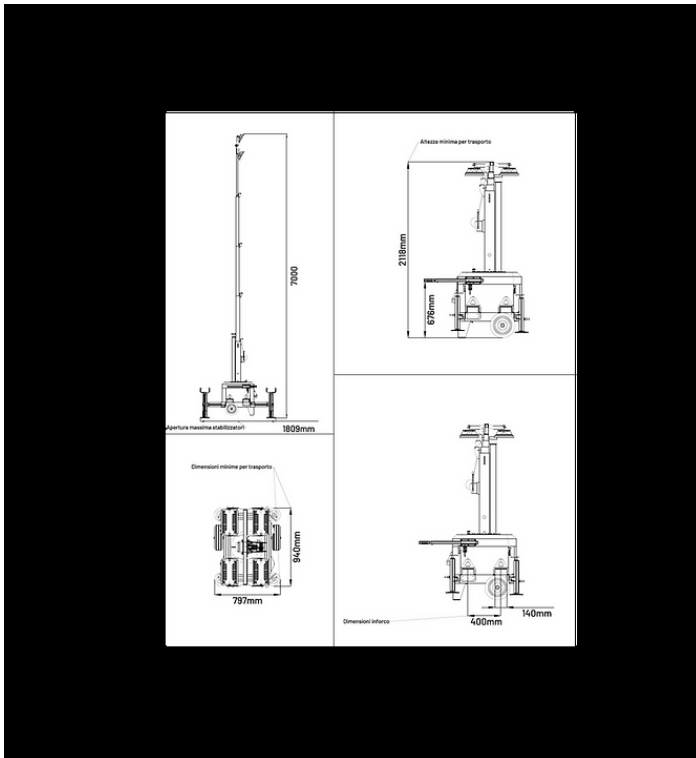

SKU: 604010003

TECHNICAL ATTRIBUTES

Voltage	230V 50Hz	Light output	78 000 lm (4x120W LED) 152 000 lm (4x240W LED)
Operating temperature	-30°C - +50°C	Dimensions open	7000 x 1809 mm
Sound level	0 dB	Dimensions closed	2118 x 940 x 797 mm
Number of lights	4	Weight	230 kg
Illuminated area	2800-3500 m ²	Max. wind speed	110 km/h
		Output	230V/16A shuko
