

DISTRIBUTION BOX 16A VM TAS16/S

The center has phase load meters that measure the voltage and current of each phase. In this way, a possible skewed load can be leveled before it causes tripping of fuses and power outages on the construction site.

Easily portable and light portfolio-style center with 230V and 16A outputs. The 230V sockets are distributed evenly for all three phases. Electricity supply to the center via a 16A plug. The center has high-quality components such as Bals sockets and Schneider's residual current protection, which is placed under a clear cover for protection.

Made of durable ABS material, the center is easy to hang on the wall and lift from its carrying handle.

SKU: 5000342/VM

TECHNICAL ATTRIBUTES

Nominal Current	16 A	Weight	4,05 kg
Nominal voltage	400 V	Mitat (L x K x P)	37 x 43 x 13 cm
Socket outlets	6 x 230V, 3 x 16A	Protection class	IP44
Input	16 A	Material	ABS
RCD	40 A 30 mA	Model	TAS16/S
		Approvals	CE
