

## DISTRIBUTION BOX 16A VM TAS16/S

The center has phase load meters that measure the voltage and current of each phase. In this way, a possible skewed load can be leveled before it causes tripping of fuses and power outages on the construction site.

Easily portable and light portfolio-style center with 230V and 16A outputs. The 230V sockets are distributed evenly for all three phases. Electricity supply to the center via a 16A plug. The center has high-quality components such as Bals sockets and Schneider's residual current protection, which is placed under a clear cover for protection.

Made of durable ABS material, the center is easy to hang on the wall and lift from its carrying handle.

SKU: 5000342/VM

### TECHNICAL ATTRIBUTES

<b>Nominal Current</b>	16 A	<b>Weight</b>	4,05 kg
<b>Nominal voltage</b>	400 V	<b>Mitat (L x K x P)</b>	37 x 43 x 13 cm
<b>Socket outlets</b>	6 x 230V, 3 x 16A	<b>Protection class</b>	IP44
<b>Input</b>	16 A	<b>Material</b>	ABS
<b>RCD</b>	40 A 30 mA	<b>Model</b>	TAS16/S
		<b>Approvals</b>	CE
