

DISTRIBUTION BOX 16A VM TAS16/S

The center has phase load meters that measure the voltage and current of each phase. In this way, a possible skewed load can be leveled before it causes tripping of fuses and power outages on the construction site.

Easily portable and light portfolio-style center with 230V and 16A outputs. The 230V sockets are distributed evenly for all three phases. Electricity supply to the center via a 16A plug. The center has high-quality components such as Bals sockets and Schneider's residual current protection, which is placed under a clear cover for protection.

Made of durable ABS material, the center is easy to hang on the wall and lift from its carrying handle.

SKU: 5000342/VM

TECHNICAL ATTRIBUTES

| | | | |
|------------------------|-------------------|--------------------------|-----------------|
| Nominal Current | 16 A | Weight | 4,05 kg |
| Nominal voltage | 400 V | Mitat (L x K x P) | 37 x 43 x 13 cm |
| Socket outlets | 6 x 230V, 3 x 16A | Protection class | IP44 |
| Input | 16 A | Material | ABS |
| RCD | 40 A 30 mA | Model | TAS16/S |
| | | Approvals | CE |
