

ELECTRIC HEATER 3KW

The 3 kW electric heater is an ideal choice for construction sites and industrial environments where fast and efficient heating is needed. The heater has three output settings – 1000W, 2000W and 3000W – giving flexibility according to your heating requirements.

An adjustable thermostat allows precise temperature control, so you can ensure optimal, even warmth throughout the space. The sturdy metal construction guarantees durability and a long service life. Thanks to the handy carrying handle, the heater is easy to move as needed. In addition, the 1.6 metre cable with a plug offers flexibility for different situations.

Safety comes first: the heater has overheating protection that protects the unit from excessive temperature.
