

ELECTRIC HEATER 5KW

The 5 kW electric heater is an ideal choice for construction sites and industrial environments where fast and efficient heating is needed. The heater has three settings: fan only, heating 2500 W and heating 5000 W. An adjustable thermostat ensures optimal, even warmth throughout the space.

The sturdy metal construction guarantees durability and a long service life. Thanks to the handy carrying handle, the heater is easy to move as needed. In addition, the 1.6 metre cable with a 400V/16A plug offers flexibility for different situations.

Safety comes first: the heater has overheating protection that protects the unit from excessive temperature.

SKU: 802010008-en

TECHNICAL ATTRIBUTES

Voltage	400V / 16A	Weight	6,65 kg
Enclosure class	IP24
