

ELECTRIC HEATER 9KW

An efficient fan heater for sites and halls.

This 9 kW 400V electric heater is designed for spaces that need fast-reacting and efficient supplementary heating. It is particularly suited to construction sites, warehouses, halls, workshops and other working spaces where heat is needed reliably and safely.

The unit runs on three-phase power (400V) and produces a heating output of up to 9 kW. The heater has several power settings, so you can use it either as a fan only or select a heating level to suit the need.

Easy to use - controlled heating

- Two power settings and a fan function
- Adjustable thermostat
- Overheating protection for safe use
- 1.6 m connection cable

SKU: 802010009-en

TECHNICAL ATTRIBUTES

Voltage	400V / 16A	Weight	6,65 kg
Enclosure class	IP24	Connection cable lenght	1,6m
