

The light and efficient frost thawing mat is made of durable PVC fabric and effective cellular rubber insulation. The mat withstands heavy wear and provides powerful frost thawing. The long-lasting heating mat is equipped with overtemperature protection and a thermostat, making it safe and easy to use. The mat is equipped with a 2 m fixed connection cable with a plug. Lockable lashing straps hold the carpet firmly on a roll during transport and storage. Sail rings at the edges of the rug make it easier to secure the rug in place.

Excellent for heating/thawing use for example:
 soil and sand
 masonry work
 protection and hardening of concrete castings
 water and sewer pipes
 cable reels
 burial sites
 implements and oil tanks
 hay and fodder bales
