AURORA 50 GROUND-SOURCE HEAT PUMP 20–51 KW – STABLE HEAT FOR TEMPORARY SITES

Tuotekortti · 1050601004

Aurora 50 ground-source heat pump is the ground-source unit of the Aurora Block modular climate control system. It delivers stable and highly efficient heat wherever borehole energy is available.

PÄÄOMINAISUUDET

- Output capacity 20–51 kW, maximum COP up to 4.5 (B0/W35)
- Automatic borehole capacity monitoring prevents ground loop overload
- Fluid heating and cooling −12…+60 °C
- Electrical supply 3 x 32 A / 400 V, max power input 19.5 kW
- Stainless steel piping and frame, weight 495 kg
- Self-venting high-efficiency circulation pump
- 2″ flange connection, modules are stackable
- Spine remote control as standard, 5-year licence included

TEKNISET TIEDOT

Tuotekoodi	1050601004	**Maximum power input**	19,5 kW
