

The **Sideflow Clean 5L** is a partial flow filter designed for continuous cleaning of central heating and cooling systems. When connected, approximately 10% of the main flow is filtered, ensuring that dirt and magnetite are efficiently captured by a combination of a filter bag and magnetic separation.

Key benefits include:

PÄÄOMINAISUUDET

- Sidestream filtration for magnetic and non-magnetic impurities
- Quick and easy installation and maintenance
- Wall-mount bracket for simple setup
- Energy-saving insulation layer
- Can be installed for both right- and left-hand operation
- Suitable for water and glycol mixtures (max. 50%)

TEKNISET TIEDOT

Tuotekoodi	17020	**Kvs value**	67,2 m3/h
Operating pressure	0,2/16,0 bar	**Flow capacity**	4,68 m3/h
Maximum system size	120 000 l	**Number of magnetic rods**	2
Flow rate (10 % system flow)	1,3 l/s	**Volume**	5,0 l
