

The **Sideflow Clean 5L** is a partial flow filter designed for continuous cleaning of central heating and cooling systems. When connected, approximately 10% of the main flow is filtered, ensuring that dirt and magnetite are efficiently captured by a combination of a filter bag and magnetic separation.

Key benefits include:

PÄÄOMINAIISUUDET

- ▶ Sidestream filtration for magnetic and non-magnetic impurities
- ▶ Quick and easy installation and maintenance
- ▶ Wall-mount bracket for simple setup
- ▶ Energy-saving insulation layer
- ▶ Can be installed for both right- and left-hand operation
- ▶ Suitable for water and glycol mixtures (max. 50%)

TEKNISET TIEDOT

Tuotekoodi	17020	Kvs-arvo	67,2 m ³ /h
Käyttöpaine	0,2/16,0 bar	Virtauskapasiteetti	4,68 m ³ /h
Järjestelmän enimmäiskoko	120 000 l	Magneettitankojen määrä	2
Virtausnopeus (10 % järjestelmävirtaus)	1,3 l/s	Volume	5,0 l
