

TESTBOY TV 416 ROTARY FIELD TESTER

The Testboy CEE Socket Tester gives you many different features in one product.

It can, among other things, control the phase order and the product indicates the current configuration on a 16A CEE power outlet (TV416) or 32A power outlet (TV432). The product indicates installation status with glow lamps (condition / not installed or broken).

Also acts as an adapter from a CEE socket to a conventional socket.

When used with Testboy Testavit Schuki 1A, 1LCD or 2K, CEE RCDs can also be tested.

User manual included.

Five year guarantee.

SKU: 155416
