

MODULAR CABINET SMC 1200

The SMC 1200 is a modular cabinet with 20 modular slots, where the content can be modified according to the needs of the construction site. By selecting only the necessary fuse switches and other components, you can save considerably. The content can be re-edited to fit the next worksite. Unnecessary module slots are covered with cover plates.

The cabinet has lifting eyes and the stand is designed for moving with a forklift. The sturdy cabinet, secured with powder-coated aluminum, stands on its own stand. The corrosion-free cabinet withstands heavy handling on site and the components behind locked doors remain safe.
