

SUBCABINET FOR FLOORLEVELS TAK 63/100A PRO KS

63/100 subcabinet with one 63A output without RCD. The feed is with fixed cable, so that suitable length cables can be measured to fit between the floor layers (however, leave a little extra cable to allow the center to be moved). The control panel is equipped with interchangeable connectors. The cabinet is made of powder-coated and corrosion-resistant 2 mm aluminum and its robust construction withstands hard handling on site. The cabinet has a carrying handle and can be hung on the wall. The covers are a self-closing security model.
