

DEHUMIDIFIER STARING DYD 50L SEMIPRO - WITHOUT PUMP

When fast and efficient moisture removal is needed in larger spaces, the Staring DYD 50L SemiPro is a safe choice. This dehumidifier, designed for professional use, is particularly suited to construction sites, water damage locations and demanding drying requirements where capacity and reliability are decisive. The unit can remove up to 50 litres of moisture per day, which shortens drying times and improves efficiency on site.

Efficient moisture management for demanding locations

The DYD 50L SemiPro is designed for continuous use in environments where moisture poses risks to structures, schedules and working conditions. A high airflow ensures that moisture is removed evenly from the whole space, not just from the immediate vicinity of the unit. Digital control and automatic defrost make operation effortless even in varying temperature conditions.

TECHNICAL ATTRIBUTES

Air production	50 L/24h (30°C RH80%)	Weight	29,7 kg
	30 L/24h (27°C RH60%)	Operating temperature	5 - 35 °C
Air current	360 m3/h	Measurements	407 x 286 x 618 mm
Kuivattavan alueen koko	0-75 m2	Sound level	50 dB

Voltage

220-240V 50 Hz

Tankin koko

6,3 L

Consumption

730 W
