

PORTABLE FIRST AID CABINET

A durable and lightweight portable first aid cabinet designed to meet safety requirements on construction sites and temporary workplaces. The sturdy aluminum frame ensures long-lasting use, while the practical design makes it easy to transport and relocate.

Complete First Aid Equipment

- Supplied with a fully equipped first aid kit
- Includes two eye wash bottles
- Integrated plaster dispenser and soft plaster roll
- Additional space for a fire extinguisher when needed

Practical and Flexible Design

- Robust aluminum frame, same as in our power distribution units
- Carrying handles on the sides and top for easy transport
- Foldable legs for compact storage and convenient mobility
- Plywood back panel for mounting brackets and accessories
- Reflective sign on the door ensures visibility, even in low light conditions

Reliable Safety Solution

The portable first aid cabinet is a complete and customizable solution for workplaces where safety comes first. Thanks to its modular design, the content can be adapted to the specific needs of your site.

SKU: 706020001

ADDITIONAL PRODUCT DESCRIPTION

Why is a well-equipped first aid cabinet required on construction sites?

EU law mandates minimum safety and health requirements for temporary or mobile construction sites under **Council Directive 92/57/EEC**. This directive obliges employers and project supervisors to ensure adequate first aid provisions are easily accessible and tailored to site-specific risks, such as eye-wash facilities during chemical exposure.
