

TSR Proled Plus 38,000 lumen LED mast light is designed for use in lighting masts, cranes, and other wide-area lighting applications. It’s ideal for both fixed and mobile installations. This light series is extremely lightweight, and its compact wind-exposed surface ensures stable performance in demanding environments.

The mast light comes with a 0.5-meter connection cable equipped with **Wieland RST series connectors**, making it ready to use as a direct replacement for Luxtower light masts. A female connector is also included for easy integration into other fixed or mobile systems.

Its housing is made from corrosion-resistant, highly heat-dissipating **marine-grade aluminium**, while the durable **polycarbonate lens** is replaceable. The standard beam angle is 60°, with other angles available upon request.

The TSR Proled Plus comes with a **5-year warranty**, backed by premium components such as **Philips 5050 Lumileds**, ensuring reliability and long service life.
