
BAU LED 48VDC led strip 20m 950lm/m – safe and efficient worksite lighting

The **BAU LED 48VDC led strip 20m 950lm/m** is designed for demanding worksite conditions that call for **even, efficient and safe lighting**. Running on 48 VDC extra-low voltage, it significantly reduces the risk of electric shock compared with a conventional 230 V system, which makes it well suited to damp, confined and challenging work environments.

Efficient and energy-saving

PÄÄOMINAISUUDET

- Light output 950 lm/m – bright, even light for working
- Consumption 9 W/m – energy-efficient for long-running use
- Ready-made 20 m length with connection cable – fast and easy to commission
- Fix the strip evenly on hooks or with cable ties
- A cable tie must never cover the LED chips
- The strip softens when warm – do not overtighten it
- In vertical installations such as staircases, support the strip properly; it cannot carry its own weight

TEKNISET TIEDOT

Tuotekoodi	606040001	**Color temperature**	5000 K
Voltage	48 VDC	**Enclosure class**	IP67
Consumption	9 W/m	**Chaining together max.**	80 m
Light output	950 lm/m	**Length**	20 m
