COMPACT GENERATOR LIGHT MAST 8,5M WITH ROAD TRAILER

Tuotekortti · 604010005

This compact and powerful generator light tower is built for demanding conditions such as construction sites, outdoor events, and remote locations. Compliant with strict Stage V emission standards, it offers an environmentally friendly and reliable lighting solution in any environment.

Equipped with four 240 W LED floodlights delivering a combined light output of 152,000 lumens, it provides excellent illumination across large areas. The trusted Yanmar 2TNV70 diesel engine, combined with glow plugs, ensures reliable starts even in cold weather. With a noise level of just 61 dB @7 m, it is also suitable for noise-sensitive areas.

The light tower can operate autonomously for up to 200 hours on a single fuel tank. An automatic start/stop feature improves fuel efficiency and extends runtime. The mast is raised with a manual winch and can be rotated 350° to direct light where needed. It withstands wind speeds of up to 110 km/h.

The canopy is durable and powder-coated for added weather protection. The unit comes with a road-tow trailer (under 750 kg, unbraked), allowing for easy transport across the EU without special permits.

Standard features include:

PÄÄOMINAISUUDET

- Dusk-to-dawn light sensor with autostart
- Battery isolator
- Oil pump extraction system
- Grid/engine selector switch

TEKNISET TIEDOT

Tuotekoodi	604010005	**Sound level**	61 dB @ 7 m
Floodlights	4 x 240 W LED	**Height**	8,5 m
Light output	152 000 lm	**Mast rotation**	350°
Engine	Yanmar 2TNV70	**Max. wind speed**	110 km/h
Emission class	Stage V	**Trailer weight**	< 750 kg
Operating time without refueling	(max.) 200 h
