

LIGHT MAST 8.5M WITH A TRAILER

The 8.5m light mast, is easy to move and handle. Its well suited for both construction sites and outdoor events. The traffic trailer facilitates transport between construction sites. Forklift pockets and lifting hooks (5 pcs.) Enable the mast to be moved with a crane and forklift.

The mast has a choice of 240W or 120W LED floodlights, of which a total of 4 will be placed on the mast. Each luminaire has its own switch. The mast stepless winch works with a friction brake. The telescopic mast is made of galvanized steel and the strong frame is powder coated. The mast's 5 stabilizers will keep it upright even in high winds (max. wind resistance 110Km/h). Power supply with the mast's own generator.

SKU: 60009996/DSE_FAST

TECHNICAL ATTRIBUTES

Length opened	2,3 - 8,5m	Fuel consumption	0,55l/h (75%)
Lighting area	3000m ²	Running time	145h
Outlets	1 x 230V max 2kVa	Starter battery	12V/18Ah
Engine	Kubota Z482 Diesel	Dimensions closed	239x138x264cm
Fuel tank	80 l	Dimensions open	239x237x850cm
		Dry weight	690kg
