

The Testboy CEE Socket Tester gives you many different features in one product.

It can, among other things, control the phase order and the product indicates the current configuration on a 16A CEE power outlet (TV416) or 32A power outlet (TV432). The product indicates installation status with glow lamps (condition / not installed or broken).

Also acts as an adapter from a CEE socket to a conventional socket.

When used with Testboy Testavit Schuki 1A, 1LCD or 2K, CEE RCDs can also be tested.

User manual included.

Five year guarantee.
