

POWER DISTRIBUTOR TAK 63/125A KS

63 / 125A chainable power distributor with fixed cable supply. In this way, suitable lengths of cable can be measured from between the layers (however, leave a little extra cable in the pole so that the distributor can be moved). The control panel is equipped with interchangeable connectors. The power distributor is made of powder-coated and corrosion-resistant 2 mm aluminum and its robust construction withstands hard handling on site. The power distributor has a carrying handle and can be hung on the wall. The covers are a self-closing security model.
