

Easy to move and light distribution box with 230V, 16A and 32A outputs. The 230V sockets are distributed evenly for all three phases. Electricity supply to the center via a 32A plug. The center has high-quality components such as Bals sockets and Schneider's residual current protection devices, which are placed under a clear cover for protection.

Made of durable ABS material, the center is easy to hang on the wall and carry from its handle.

The center has phase meters that measure the voltage and current of each phase. In this way, a possible skew load between the phases can be smoothed out before it causes tripping of fuses and power outages on the construction site.

TEKNISET TIEDOT

Tuotekoodi	5000341/VM	**Enclosure class**	IP44
Nominal Current	32 A	**Material**	ABS
Nominal voltage	400 V	**Model**	TAS32/S/VM
Sockets	6 x 16 A/230 V Schuko, 2 x 16 A, 1 x 32 A	**Approvals**	CE
RCD	40 A 30mA
